

#PEACE, EDUCATION, AND DEVELOPMENT

Author: Blade Da Plug

Disclaimer: I am not an economic adviser nor a linguistic adviser, this book is not educational advice, nor should it be to advise economic analysts. Please refer to an economic adviser for economic advice and refer to a qualified person who can assist you on other expert opinions. Take this information as a grain of salt. I am an opportunist; I see an opportunity for (reformative) communism.

Note: This is incomplete. Please share to other working-class consciousness, edit to a book and debate what you think makes sense from the pdf.

**Everyone can be a
worker but not
everyone can be rich,
then why is the
economy based on
wealth.**

Chapter 1

Economic thinking.....*There is no supreme savior (person)* (from the international song).

Friend of a friend is a stranger. Enemy of an enemy is a stranger. Friend of an enemy is a stranger.

What do u guys prefer to happen after a revolution.

Revolution are changes/movements to remove a government and reforms are changes/movements to improve a government. If u have a revolution against a democracy, then you are revolting against the people.

Figure 1

Figure 2

[1]

Definitions

Google definition

Capitalism-an economy in which a country's trade and industry are controlled by private owners for profit.

Communism- an economy where all property is owned by the community and each person contributes and receives according to their ability and needs.

Socialism- an economy where the means of production, distribution and exchange should be owned or regulated by the community.

My debunk statements for anti-communists- If the communist economy means having all its property owned by a community, then what is a monarchy system; is it communism. The economic systems are differentiated by profit to whom, sustainability for who, and democracy/control/management at a workplace by who. Trickle-down economics must start the trickle from workers not from capital owners.

Which system is better?

- The workers led by capital hoarders.
- The workers led by other workers.
- The workers led by politicians.

-Workers led by themselves(entrepreneurship/individual) or workers led by _____.

My Paraphrase

Communism: An economy of the workers by the workers (or the people who support workers) for the workers. Workers State.

Socialism: An economy of the community by the community for the community. What is a community? Is it people of a certain race, unemployed people, revolutionaries, group of certain people, wealthy people, or politicians.

Capitalism: An economy of the rich by the rich (or the people who support rich) for the rich.

Why support the 4th international?

My Strawman argument: Everyone can be a worker but not everyone can be rich, if the economy must work for everyone then why use capitalism.

There must be unity of workers in struggle and resolution/support of other workers, but not in debate nor ideas. No puppeteering's.

Everyone can be a worker not everyone can be rich, Everyone can be a worker not everyone can be white, Everyone can be a worker not everyone can be black, Everyone can be a worker not everyone can be an engineer, Everyone can be a worker not everyone can be school teacher, Everyone can be a worker not everyone can be doctor/nurse, Everyone can be a worker not everyone can be soldier, Everyone can be a worker not everyone can be a politician etc.

There were 4 internationals for communist/socialists, the first, second and fourth international advocate for a worker driven or dictated economy and the benefits go to the workers instead of going to the capital (wealthy) owners.

The 3rd international makes an excuse for the politicians to be the vanguard of communism i.e., the revolutionary politicians become ministers of industries or managers of SOEs without any research education nor a good work experience on the industry they are willing to manage. The third international is dead. The third international has no democracy, a degeneration of workers from leadership and too much loyalty to the party and not to the citizens nor people.

1st international- International workingmen's Association (IWA).

2nd international- Anti-colonization and antiwar.

3rd international- USSR (An economy of the politicians by the politicians (or the people who support workers) for the workers), socialism in one country.

4th international- Trotskyism (permanent revolution), dictatorship of workers and permanent revolution.

5th international- Derivation of 4th international.

Quick Question

Do you know left communism??

Why don't I support capitalism?

It's an economic system built to support or maintain the dominance of a few groups of individuals (capital hoarders). The capitalistic system prospers well through division of labour, society, economy

etc. Capitalists can promote equality through capitalism, it is not a unifying system hence it will always fail in fact capitalism won't fail but the people under capitalism will suffer. The workers will always get peanuts compared to what the capitalist can squeeze out of the laborers. Capitalists simp for rich people and communists simp for workers.

Why I don't support Anarchy.

I want a functioning big government of the people mainly governed by the workers. What is the difference between libertarians and anarchists.

Figure 3

[]

How can worker sensitive economy be implemented?

1. 4R process= Random selection of workers, meet Requirements (education and work experience, etc.), Regulations for good governance and Rotation of workers.
2. The 4R process can be applied in the private sector and the public sector. The Random selection is to prevent people from organizing crime in the business, people must be strangers or utmost be worker comrades not criminal comrades. The Requirements are to ensure that the workers have minimum education/skill or work experience; a teacher must be good at teaching, an engineer must be good at engineering, a doctor must be good at doctoring, police must be good at policing etc. Rotation is for term limits to prevent (Cult of personality) dictators staying in power, management must have rotation. For some cases the rotation might not happen as per time interval, but instead as project completion. Regulation is for learning from lessons of the past and improve what's improvable, cancel what needs to be canceled and bring in innovations or creativity.
3. Use reformation not revolution. For democratic rule don't use revolution, because a revolution leads to extreme conditions it leads to anarchy or dictatorship by the revolutionaries and politicians.
4. Identify problems and identify good solution for problems. The strikes and revolt/protests won't always bring good solutions.
5. A worker's council must be part of parliament. The workers must be elected by other workers (union workers or non-union workers). The working council are not politicians or serve the interests of politicians. Their work is to be like the lawyers in parliament, i.e., to verify or rectify the ideas, laws, and fantasies (unrealistic expectations) of politicians to make them realistic and

appropriate for workers. The workers can be reform workers, revolutionary workers, political workers etc.

Arrest diploma mill graduates

6. Bigger profits must go to workers, not capitalists/revolutionaries nor politicians.
7. The tax payment must not start from top to bottom but instead should start from bottom towards the top. The tax allocation moves from local government planning, improvement, and maintenance of services and other things. The tax moves from local to provincial management and then to national government. After all the planning and implementation, the excess money is sent back to provincial and local projects/worker-based projects.
8. The people who paid tax must be rewarded by government when the country is booming.
9. The taxation of finalized goods can be a portion of the goods produced to be sold. Service industries get money taxed. The portion of food taxed is sold by government or supplied to welfare or workers.
10. When public teachers don't attend school, they get deducted salaries, and the money is given back to parents/taxpayers. When government workers are lazy their salaries must be deducted.
11. Welfare must be for poor employed workers who pay tax, not unemployed people. For poor workers who are temporarily unemployed there must be a time limit for them to find another job so that they can be in welfare (maybe 3 months).
12. Trickle-down economics must be workers tricking down money to the masses rather than the capitalists trickling money down to the masses.
13. Worker must self-emancipate and not rely on being guided by non-workers or union leaders who hoard power (no rotation of leadership).
14. There should be a private company which will monitor public industry corruption and a public company to monitor private industry corruption. Reports are made public for the people. These companies must not be used as smearing tools, the reports must be true and unbiased towards a party/ towards a company.
15. Some government investment should go to best performing (profit and supportive to workers) logarithm scale measured private businesses that pay full taxes.
16. A worker must have more than one career. Be a doctor and engineer/ be an actor and a lawyer etc., make your own choice which career you want but don't rely on one career. Multi career.
17. When the economy is in profit the reward money is given to workers who pay tax.
18. Colonialism-foreigners oppressing natives. Right wing Nationalism natives oppressing foreigners.
19. The elections of presidents/political parties, each voter must vote for 5 political parties. If a vote does not have 5 selections it does not count. There must be term limits for a political party at winning elections/being the governing. After 8 years their vote must not go to count for them to be president. They will be members of parliament though and then after 4 years will be eligible to be elected for presidency.
20. Government aid to workers.
21. For unity of two or more countries there must be elections in which the two countries must win support votes by 70% (at each country). The parliament members are combined and rotates among the countries yearly. The laws are redefined so that the two countries agree on which issues or laws to support/work on. There is absolute/totalitarian renewal of the two/more countries into one (what laws apply in country A also apply in country B).
22. Increase tax on property income, property that is not valuable (valuable from hype not from its capabilities) and reduce tax on worker income. Increase tax on property which is not

used/decrease value of unused land and subsidies profitable worker incomes (essential workers which are making small money).

23. Singularity of the economy is inefficient. Diversify.

Unions should have their own enterprises

24. The companies/people that pay tax can be rewarded when government GDP is high.
25. Appointed ministers are people with education and experience of the department.
26. The police must not be replaced by military. THE MILITARY is for external threats, but the police is for internal threats.
27. Mandatory tutorials and extra classes for university and school students. Time limit to student funding and project funding.
28. Retirement investment is unreliable, people can save money in their own savings. What are the chances that people will until 60-65?
29. Tax the loans.
30. What is the point of free education if people don't get jobs?
31. Poor countries must do trade together more often than they do with rich country. Especially trade on developmental things/projects. To avoid being tricked by rich countries.

Figure 4

[]

32. There should be a limit to how much a one person/company/family corporation can own LAND. The other land must be rented. This is to allow more potential ownership for land by many/all people.
33. Culture is of and by the people, it is not for monarchies.
34. Money should have a limit for each person onto what he/she must buy. Buying must proportion if there is excess then products don't have to be proportion. Money should not be capable of buying everything. There should be a limit to what money can be used for. Rich people should not be allowed to buy everything.
35. SOEs must develop themselves and not be static.
36. If banks, make a profit the banks must pay the customers or the people of which the bank took from.
37. No to anarchy, no to monarchy, no to wealth-based economy, no to dictatorship and no to martyrdom. Yes, to worker control.
38. Economy must be defined by work-based profiteering e.g., entrepreneurship (Sole proprietorship), union owned companies, worker controlled SOEs, private companies (international and local) with workers, worker co-ops, patron businesses and any worker supportive enterprises/companies.
39. Advertising should be of healthy products; unhealthy foods must not be advertised.

Owners of unused land must be penalised.

- 40. Increase tax on generational wealth.
- 41. Capital gains tax of a company must be used to pay workers of that company.
- 42. Every company pays the same tax rate. No tax breaks/ incentives/charity tax. Everyone is taxed by the same percentage, no tax brackets.
- 43. Avoid government and private industry corruptions. Government leadership randomization might be useful for fighting corruption.
- 44. Corrupt ministers must face lawsuits by the public/people. Anyone can do a lawsuit against the government minister. Money must come out of their personal wallets. The ministers must work for local public entities for free/no salary. They must be jail and work for forced public hard labour (build roads, schools, cut grass etc.). They should use public services as any poor person. Jail must have brainwash techniques to change people's mind to do good things, instead of people being freed from prison and prefer to do bad things again.

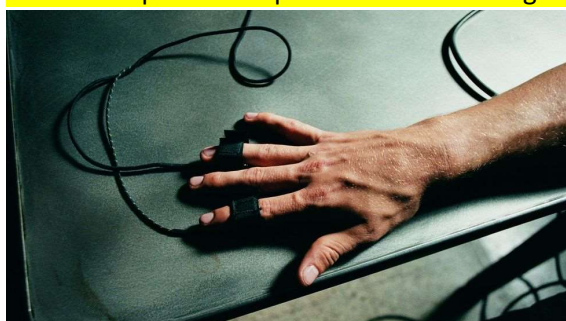

Figure 5: Polygraph Test

[]

- 45. A polygraph test must be compulsory used in courts for the people being asked question (Victims, defendants, and witnesses) to tell the truth. If we rely on sham trials, then innocent people might be purged.

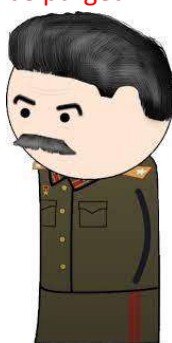

Figure 6

[5]

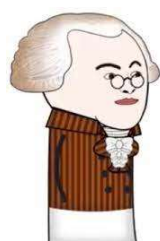

Figure 7

[6]

Figure 8: Alexey Mikhailovich Schastny

[]

Figure 9

[]

46. Research and development projects must have finite resources and time limits.
47. Bartering must have a standard or group of tradable items i.e., quantity and quality, time before expire date and production process must be standardized.
48. Government should fine businesses that don't keep their work areas clean.
49. The art of short selling businesses must be used when the economy is bullish. When the economy is super bearish /when the economy is struggling short selling is closed/temporarily stopped.
50. RDP houses must be randomly monitored yearly to see if people live there.
51. Cameras must be mandatory in cars. For traffic officers to arrest people who cause accidents or do reckless driving.
52. When an investor is guilty of insider trading his/her profit, property and assets are liquidated and given to poor workers.
53. Tax is used in local government then used in provincial government and lastly the surplus is used in national government. The national government can redistribute money to poor communities.
54. If traffic officer or police is being bribed by a person, the bribing person can record the bribe and win money from the police officers' salary. The bribery must be investigated using a polygraph test.

Opposition parties are bafana bafana

Government aid programs rdp, food aid,
water, nsfas must help poor and be regular
checked to see if people are staying in the
house or people are studying and passing.
If people are lying they must be sent to jail.

Government officials must not have
international bank accounts.

Bartering for raw materials is at weight
animals are on size. Bartering for
manufactured goods with manufactured
goods is on auction. Bartering for
manufactured (in that country) goods is on
a scale of importance for society and
economy ie patents products .

People who claim election fraud but don't
have proof must be arrested

Sectors of the economy: NGOs, state
owned (diversified research) .

Union(uniform research) owned start-ups
these start ups must not plagiarize other
companies.worker co-operatives(profit) .

Private locally owned(profit) . International
owned. Experimental company.

- ❖ Protectionism must be used to regulate the economy to support and improve/develop local workers.
- ❖ [Marriage] In a divorce settlement 50/50 must stop. Money to support must be a percentage of money relative to the salary of the lower earning partner. i.e., if a rich wife must pay her husband, the money must be relative to the salary of the non-rich husband.
- ❖ Marriage is waste of money. Supporting your (wife/husband) and kids is good.
- ❖ **Public statues and monuments are a waste of money. Museums are better.**

Miscellaneous and Random

How can the people (democracy) reverse anarchy?...

Dear reader how can you improve socialism and communism to be effective and efficient?

What's the difference between shock therapy and revolution?

What's the difference between anarchy and liberty (no government)?

Why do unions support individual parties, why not support multiple parties?

I say trickledown economics must be from the workers in a worker based (bigger profits to the workers), what do u say?

Screw MATHS LIT it sabotages potential mathematics related work. A maths lit educated individual cannot do maths related jobs, but a maths educated individual can do maths lit jobs.

I say multiple careers can help more people not to rely on one career, what do u SAY DAWG?

Shouldn't banks owe bank customers their (the bank) profits.

The first rule of discussion club is: **you do not talk about Discussion Club**. The second rule of Discussion Club is: you DO NOT talk about Discussion Club! Third rule of Discussion Club: if someone yells “stop!”, keeps quiet, or taps out, the debate is over. Fourth rule: only two people to a debate.

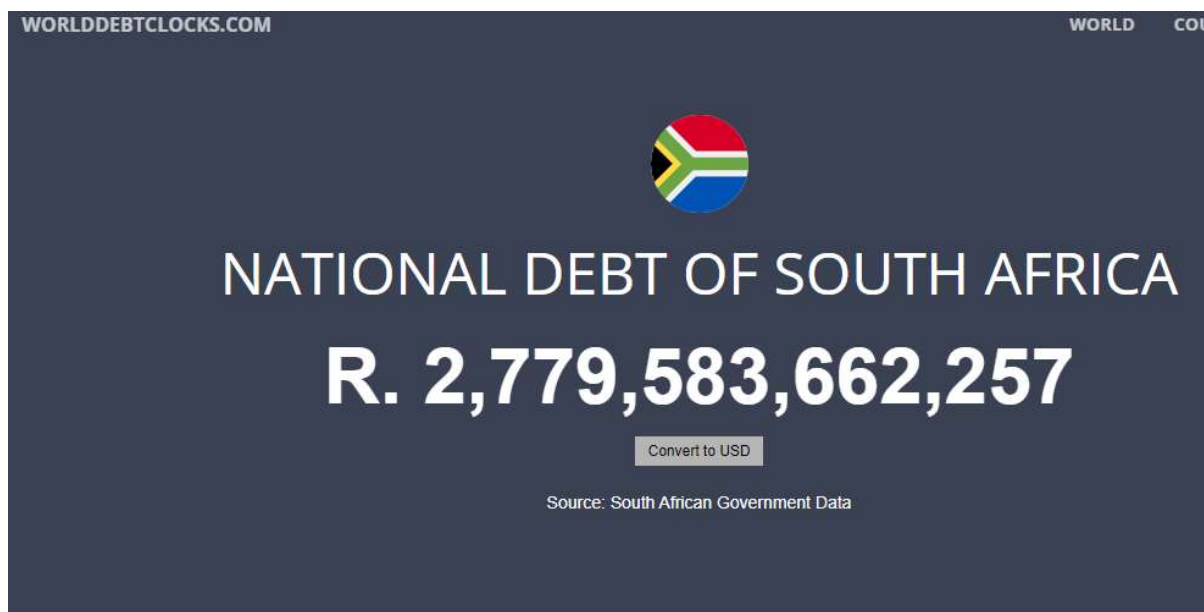

Figure 10: National debt

About the Russian civil war

All practical work in connection with the organisation of the uprising was done under the immediate direction of Comrade Trotsky, the President of the Petrograd Soviet. It can be stated with certainty that the Party is indebted primarily and principally to Comrade Trotsky for the rapid going over of the garrison to the side of the Soviet and the efficient way the work of the Military Revolutionary Committee was organized. -Stalin []

Julius Martov said: "The beast has licked hot human blood. The man-killing machine is brought into motion... But blood breeds' blood... We witness the growth of the bitterness of the civil war, the growing bestiality of men engaged in it." []

Some Random pics

Chapter 2

Why do directors think that they are the only film painters/artists the actors, cast and crew are also painters and artists to the movies. Everyone paints his part.

Why are children allowed to work in film factories but not allowed to work in car, clothes and other forms of factories?

[This chapter is for stories/short scripts/movies about workers. You can write your own movie/script about workers]

Chapter 3

English does not make sense; it has no sense. The singular and plural words don't add up. For instance, why is the singular word man have a plural as men..... smh 😞, it's a bit confusing for us to understand because English is not our mother tongue. What exactly are the English rules for language building because there are plenty of exceptional words. The plural of person is people, how can anyone without a good English vocabulary predict the plural of man or person.

The following words are some of the words which are confusing:

| | | | | | |
|--------------|----------|---------------|------------------|----------|------|
| Car-cars | ant-ants | Person-people | chicken-chickens | cow-cows | <Cow |
| and chicken> | fan-fans | woman-women | man-men | | |

English does a lot of plagiarism from other languages; it does not have to paraphrase words. The words which are taken from other languages are spelled the same as if they are used on their original language. Some words are not plagiarized but their use in English is not relevant to other words from English e.g., physical has a ph not an f or the spelling of light with a gh; why not use lite as light.

Chapter 4

1. Does the big bang have a repetition?
2. How huge is the universe and how huge is the area or volume or dimension outside the universe? What about the ancestors, dinosaurs and the Australopithecus existence being erased by religion.
3. Y.O.L.O.
4. Colonization of Africa.
5. Egypt monuments were built by workers not by aliens or mythical elements.

Those are some of my atheist thoughts.

Ideas last longer than personalities. Most people don't care about who invented something, people care how use it, how to improve it, how to replicate and other useful ideas.

Workers are necessary to help the people when a country gets a natural disaster/ when the planet gets a natural disaster or when the universe gets a natural disaster. The capital owners don't necessarily have skills to solve natural disasters they can hoard money to buy out land or screw over other people if they want to (charity is unreliable).

The Prayer is not going to solve problems. Problems get solved by solutions from researchers and workers. Improvement and maintenance of everything can be done by workers and not politicians or capitalists or preachers.

Long-haired preachers come out every night
To tell you what's wrong and what's right
But when asked how about something to eat
They will answer in voices so sweet:

You will eat, bye and bye
In that glorious land above the sky
Work and pray, live on hay
You'll get pie in the sky when you die.
That's a lie

Lyrics from a song called pie in the sky
